atts, 2012. The game is set on a science fiction inspired world. In this world the parasites have formed a society called the Zhugulop and the Kreegel is the one who commands it. You play as the Kreegel who has now turned the power in his hands by his quest to find a cure for the growing parasite infestation on Earth. The Kreegel is sent out in the Human Sphere by the Zhugulop who wants to find the "Red Rose", a cure to the parasites. When the Kreegel leaves the Human Sphere he has to survive in a very hostile environment and find the Red Rose. If the Kreegel dies, it is the end for mankind.Q: How to read text file in raspbian without comma? I want to read the text file in raspbian. But the text file has comma character in it. The comma character makes it not read correctly. Here is the text file: data.txt Hello, world Here is my code: f_input = file("data.txt", "r") text_input = f_input.read() f_input.close() print(text_input) How can I solve this problem? A: There are lots of possible reasons why this could happen. It's hard to be sure without seeing the actual text file. Could it be the line-ending marker is '\r' instead of '\n'? In any case, it looks like this is pretty simple to fix: f_input = open("data.txt", "r") print(text_input.replace(","," ")) or, if you really want to replace the commas with a space: text_input = text_input.replace(","," ") /* Copyright (c) 2008-2020, Hazelcast, Inc.
