How to resolve this problem? I was wondering if anyone can tell me why I can't get the AVI video converter to run. It worked before but the install is messed up. First, I was to install it on a new HDD and every time I tried to run the software it would start and when I went to open it, it would crash. I then tried to copy the install over to my main HDD and since then I can't get it to work. The install opens, then I try to open the software and it crashes. Anyone have a solution? I was just wanting to be able to copy my movies over from my old HDD. When I try to run OBS on my PC I get an error message saying "The application name is not recognised as valid win32 application or OBS is not installed on this computer. Please re-install OBS or use the 'run' command, OR install the application to default location." I am running Windows 7 64 bit, OBS version is 0.53. I just want to be able to record from my HDTV and play back games on the same computer. I'm really lost here, because it worked a while ago and now this error shows up. It is pretty weird. I need to use Windows 7 ultimate 64 bit, and I use a NVIDIA nForce 4 motherboard. P.S. Another weird thing, when I tried to install nVidia video drivers from the nVidia website and reboot, the computer froze. It took me 10 minutes to turn it off and restart. Can I install the video drivers and reboot at the same time? I have the same problem with a new link that was added to the post. It says: "The application name is not recognised as valid win32 application or OBS is not installed on this computer. Please re-install OBS or use the 'run' command, OR install the application to default location." I'm getting the same error when I try to run the OBS application and no matter what I do I can't seem to get it to work. I have tried downloading and re-installing several times and reinstalling everything completely. I'm running Windows 7 64 bit and I use a ASUS nVidia graphics card. Can anyone help me? I really want to be able to record/stream from my HDTV to my computer and play games on it 82157476af
